---

*AI Engineer Intern and Software Developer with experience building web applications and AI-powered solutions. Skilled in developing Retrieval-Augmented Generation (RAG) systems, semantic search workflows, and integrating Large Language Models (LLMs) with enterprise data sources using Pinecone and Azure AI Search. Strong background in JavaScript, React, Node.js, and Python. Passionate about applying AI to solve real-world problems while continuously learning and sharing knowledge with others.*

## PROFESSIONAL EXPERIENCE

---

### BYU Pathway

Idaho, USA

#### Intern - AI Engineer

2025 – Present

- Developed Retrieval-Augmented Generation (RAG) solutions to improve the accuracy and relevance of AI-generated responses.
- Implemented semantic search systems using Pinecone and Azure AI Search for efficient document retrieval.
- Created and optimized vector indexing pipelines for storing and querying embeddings.
- Built backend services in Python to connect AI models, vector databases, and enterprise data sources.
- Collaborated in the development and testing of AI-powered applications using modern software engineering practices.
- Worked with REST APIs, Git/GitHub, and cloud-based AI services to deliver production-ready solutions.
- Researched and implemented best practices for Generative AI, vector search, and knowledge retrieval systems.

### Funval

Guatemala City, Guatemala

#### Web Development Instructor

2023 – Present

- Teach web development with a focus on HTML, CSS, Tailwind CSS, JavaScript, Node.js and React.
- Incorporated tools such as Git, GitHub, and Figma into course projects to mirror industry workflows.
- Guide students through real-world projects and debugging sessions, reinforcing modern development practices.
- Collaborate with the academic team to ensure content accuracy and relevance to industry standards.

#### Academic Controller

- Coordinated academic operations of the Web Development School, driving curriculum improvements and optimizing student learning outcomes.
- Introduced new tracking and feedback systems that improved engagement by 30%.
- Worked closely with developers and instructors to align course content with real-world software development workflows.

## ADDITIONAL SKILLS

---

- Proficient in JavaScript, HTML, CSS, and modern frameworks including React and Express.
- Experienced with Git and GitHub for version control and collaborative software development.
- Skilled in Tailwind CSS for responsive and utility-first UI development.
- Backend experience with Node.js, PHP, and Laravel; working knowledge of RESTful API design and integration.

- Familiar with Python and C# for scripting, automation, and software development.
- Experience developing AI-powered applications using Large Language Models (LLMs).
- Knowledge of Retrieval-Augmented Generation (RAG) architectures for context-aware AI systems.
- Experience working with vector databases and semantic search technologies, including Pinecone and Azure AI Search.
- Familiar with document ingestion, text chunking, embeddings generation, and vector indexing workflows.
- Skilled in prompt engineering and optimization for generative AI applications.
- Understanding of semantic search, hybrid search, and knowledge retrieval systems.
- Experience integrating AI services and APIs into web applications and backend systems.
- Comfortable using Figma for UI design and prototyping.
- Native Spanish speaker; fluent in English.
